

OXYGEN FORENSICS

AT A GLANCE

Founded in 2000, Oxygen Forensics has been developing solutions by providing unparalleled innovation to users and investigators around the world. Many companies in the industry attempt to delve into computer, network and mobile forensics, with a touch of cybersecurity, to the detriment of the customer. At Oxygen Forensics, we have, and always will, provide tools that specialize in uncovering and processing data from mobile devices and cloud services. This laser focused product development approach has allowed our engineers to build a solution from the ground up using the most innovative advancements in the industry. With unmatched multi-device collection, processing and decoding speed, and powerful analytics, Oxygen Forensics stands alone as the most advanced forensic data examination company for mobile devices and cloud services available.

OUR FLAGSHIP PRODUCT

Oxygen Forensic Detective, powered by Jet Engine, is an all-in-one forensic software platform built to extract, decode, and analyze data from multiple digital sources: mobile devices, device backups, UICC and media cards, and cloud services. Since mobile artifacts can also be located on computers, Oxygen Forensic Detective can also find and extract mobile related artifacts from Windows, MAC, and Linux machines. Cutting edge and innovative technologies found in Oxygen Forensic Detective include, but are not limited to: bypassing screen locks, locating passwords to encrypted backups, extracting and parsing data from secure applications and uncovering data that may have been deleted. Furthermore, multiple device, cloud and media card extractions can be investigated in a single interface to gain a complete picture of the data. By using the integrated industry leading built-in analytical tools to find social connections, timelines, and connection links, investigators can help to make this world a safer place.

OUR HISTORY

- 2000** The company founded
- 2002** Oxygen Phone Manager, a powerful alternative to Nokia PC Suite, was released
- 2004** OxyAgent was invented. The utility for logical data extraction from smartphones
- 2004** The first edition of our forensic software
- 2008** The second edition of our forensic software
- 2010** We were the first to incorporate analytics into forensic software by introducing Timeline section
- 2012** We've focused on apps data parsing
- 2014** The industry-first Oxygen Forensic® Cloud Extractor was released
- 2018** Leadership on drone forensics with industry-exclusive extraction methods
- 2020** Oxygen Forensic® Detective v.12 - 3 times faster at processing data than any other forensic product.

OUR CLIENTS

Our software has been successfully used in more than 150 countries across the globe including the USA, UK, Germany, Spain, Italy, Finland, Australia, China, Singapore, Hong Kong, Brazil etc.
